

I am an XM satellite radio listener who benefits greatly from XM's traffic and weather channels. As a broadcaster myself for 25 years, I enjoy the variety and quality of satellite listening that far surpasses what's available on AM and FM radio. I was pleased when weather and traffic reports became available on XM. While I often agree with positions taken by the NAB, I heartily disagree on the matter of petition 04-160. The NAB should not have the right to interfere with satellite's business practices or my right to enjoy the convenience of weather and traffic reports that XM satellite radio provides. I urge you to reject NAB's petition 04-160.
